# DS 400 mobile - Affordable mobile chart recorder

Energy analysis - consumption measurement - leakage calculation at compressed air systems

#### Advantages at a glance:

- Easy operation via 3.5" colour screen with touch panel
- Internally rechargeable Li-lon battery about 8 hours continuous operation

#### Versatile:

· Up to 4 sensors / meters can be connected, including third-party sensors / counters incl. power supply

#### Reliable:

· Reliably stores all measured values on a memory card. Easy reading out via USB stick possible

#### Intelligent energy analysis:

- Costs in € per generated m³ air
- kWh/m³ generated air
- Consumption of single lines including summation

Up to 4 sensors can be connected including power supply for all sensors

Easy & intuitive in its operation

Saves time & costs on installation

### Sensors for DS 500 / DS 400 mobile

Digital

#### Digital

#### Digital / Analogue

#### Flow meters for compressed air and gases

- Installation and removal under pressure via standard 1/2" ball
- A safety ring avoids the uncontrolled ejection in case of installation/removal under
- Usable for different gases: Compressed air, nitrogen, argon, CO2, oxygen

#### **Dew point sensors**

- Extremely stable in the long
- Quick adaption time
- Large measuring range (-80° to +20 °Ctd)
- For all dryers: (Adsorption dryers, membrane dryers and refrigeration dryers)
- Easy installation under pressure via the standard measuring chamber with quick coupling

#### **Pressure sensors**

- Large selection of pressure sensors with different measuring ranges for each measuring purpose
- Quick installation under pressure by quick coupling
- Pressure probe 0-10/16/40/100/250/400 overpressure
- Pressure probe -1 to +15 bar (underpressure/overpressure)
- Differential pressure 0...1.6 bar
- Absolute pressure 0 1.6 bar

#### **Temperature sensors**

- Large selection of temperature sensors e.g. for measurement of the ambient temperature or gas temperature
- Pt 100 (2- or 3-wire)
- Pt 1000 (2- or 3-wire)
- Temperature sensors with measuring transducer (4-20 mA output)

- Monitoring of compressed air quality according to ISO 8573
- Residual oil, particles, residual moisture

- Particle counter PC 400 in a service case
- up to 0.1 um or
- up to 0.3 µm

- For the analysis of compressors (load and idle times, energy consumption, on/off cycles) the current consumption of up to 12 compressors is recorded by clamp-on ammeter
- Measuring range of the clampon ammeters:

0 - 400 A

0 - 1000 A

- CS PM 600 mobile current/ effective power meter with external current transformers for large machines and plants
- External current transformers for encompassing the phases (100 A or 600 A)
- External magnetic measuring tip for measuring the voltage
- Measures KW, kWh, cos phi, kVar, kVA
- Data transmission DS 400 mobile via Modbus

**Current/effective power** meters

Clamp-on ammeters

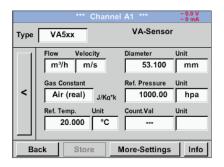

Digital

By means of the chart recorder DS 400 mobile, all measured data of a compressor station can be recorded, indicated and evaluated. All sensors of our product range can be connected to the digital sensor inputs, e.g.:

flow meters, dew point sensors, current/effective power meters and third-party sensors with Modbus (RS 485).

At analogue sensor inputs third party sensors and meters with the following signal output could be connected: 4-20 mA, 0-20 mA | 0-1 V / 0-10 V / 0-30 V | Pt 100 (2- or 3-wire), Pt 1000 (2- or 3-wire), pulse outputs (e.g. of gas meters), Modbus protocol

## Configuration of flow sensor

In the menu of the DS 500 mobile / DS 400 mobile, the flow meter VA 500 can be set to the respective pipe inside diameter. Furthermore, the unit, the gas type and the reference condition can be set. The meter reading can be set to "zero" if necessary.

## Graphic view

In the graphic view all measured values are indicated as curves.

It is possible to browse back on the time axis by a slide of the finger (without data logger maximum 24 h, with data logger back to the start of the measurement).

## Data logger

With the option "integrated data logger", the measured values are stored in the DS 500/DS 400. The time interval can be freely set. Furthermore there is the possibility to fix the starting time and the end time of the data recording. Read-out of the measured data via USB interface or via the optional Ethernet interface.

# Selection of the language

Many languages are already stored in every DS 500 mobile/DS 400 mobile. The desired language can be selected via the selection button.

# All relevant parameters at a glance

In addition to the flow rate in m³/h, the DS 500 mobile/DS 400 mobile also displays other parameters such as total consumption in m³ and speed in m/s.

ORDER NO.

INPUT SIGNALS

# Technical data of DS 400 mobile

TECHNICAL DATA DS 400 MOBILE		
Dimensions:	270 x 225 x 156 mm (W x H x D)	
Weight:	2.2 kg	
Inputs:	2 x 2 sensor inputs for digital or analogueue sensor signals	
Interface:	USB (standard), Ethernet (optional)	
Power supply:	Internal rechargeable Li-Ion batteries, approx 8 h continuos operation, 4 h charging time	
Options:		
Integrated data logger:	100 million measured values start/stop time, measuring rate freely adjustable	
2 additional sensor inputs:	For connection of pressure sensors, temperature sensors, clampon ammeters, third-party sensors with 420 mA, 0 to 10 V. Pt 100.
